

## NATURESWAY GUARANTEE

We guarantee our pups from the time they leave our kennel against any hereditary diseases up to 3 years of age. Hip dysplasia is one of the leading problems in large dogs such as labs, and we have done everything possible to see that it does not become a factor in these pups. All of the puppies ancestors have certified hips. The only way to know for sure is to have an X-ray done on the dogs hips after it is 24 months old. A major genetic defect is considered to be any genetic problem such as PRA, severe hip or elbow dysplasia. Problems caused by accident, neglect, obesity or abuse will not be covered. The dog must be owned by the original purchaser. We will guarantee these pups only if X-rayed by a Veterinarian, and sent to OVC or OFA for Certification before the dog is 24 months of age. Also, the dog must not have sired or whelped a litter of pups. If your dog is diagnosed with hip dysplasia, or a genetic disease eye like P.R.A., this is what we will do. Once your Vet has confirmed the problem with us, we will give you, the owner—(the person whose name appears on the registration) these two options:

1) We will gladly allow you to keep your dog, as long as the condition is not so severe as to cause the dog daily pain or discomfort. You must have the animal spayed or neutered, and if you choose, we will replace your pup with one from our next litter.

2) If you choose not to take a pup from our next litter, we are willing to refund the total purchase price to you.

Keep in mind, we want to be as fair as possible with you if any of these situations should ever arise.

Please note that all Vet expenses for X-rays or eye examinations are to be paid for by the owner. If any of the aforementioned conditions do occur, please inform us immediately.

Thank you
